DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a compound, classified in class 502, subclass 258.
- II. Claims 6-29, drawn to a method of polymerizing an aromatic monomer, classified in class 528, subclass 486.
- III. Claims 30-33, drawn to an assembled hematin, classified in class 428, subclass 659.
- IV. Claims 34-40, drawn to another method of polymerizing an aromatic monomer, classified in class 427, subclass 407.1.
- V. Claims 41-44, drawn to a method of forming assembled hematin, classified in class 427, subclass 405.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the products as claimed can be practiced with another materially different product such as a template with assembled hematin, as in group IV.

Art Unit: 1711

Inventions V and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as using different layers for each step.

Inventions II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are based on different reactants under cited conditions to form different products..
